

HOT NEW PRODUCT FROM

Tributaries® Adds Two HDMI Cables to Line-up

PRO 18Gbps Passive HDMI - 5 meter

AURORA 18Gbps Hybrid Optical HDMI - 40 meter

Tributaries is proud to announce two more HDMI cables to its' 18Gbps line-up; a 40 meter AURORA and a passive 5 meter UHDP PRO cable is now available. Both HDMI cables have been certified by DPL Labs® and ISF® for 18Gbps performance ensuring the capability of passing a 4K/60 HDR signal.

The 40 meter AURORA, hybrid fiber optic cable, is the most stable long length 18Gbps solution available. "These are the best AOC I have seen", said Matt Murray of AVPRO Store, "they will actually pass HDMI 2.0 w/o equalization. It is rather impressive; I had not seen it before." A marvel of electro-optical engineering, AURORA combines the best of worlds, glass and copper; glass transports the video/audio/clock and control signals while the copper carries the Digital Display Channel (DDC) responsible for the 2-way communication of EDID and HDCP.

The UHDP PRO 5 meter cable is now offered in a passive model. Why is passive such a big deal? As any installer knows, passive HDMI cables are always preferred over active. In addition to incompatibility issues with other electronics, active cables are directional and will not work if reversed. The active end of the cable must be connected to the display and requires power to supply the on-board electronics; typically, these cables harvest their power from unused TMDS voltages. This method works well as long as the source which drives the 5V line has an adequate output. If the source voltage is too low it will draw down the vital 5 volt line. Passive cables are bi-directional and voltage agnostic, making any long run installation simpler and more stable. The new passive 5 meter UHDP Pro replaces the previously 10.2Gbps active

cable of the same length.

Tributaries' AURORA 40 meter and PRO 5 meter passive cables are 18Gbps certified by DPL Labs and ISF for reliable performance.

REMEMBER: Tributaries is the only cable company that hand-tests and validates every HDMI cable before it is shipped.

Totally Tributaries: Tested, Tried & Trusted.
