TRIBUTARIES proudly introduces an HDMI™ 1.3 Distribution Amplifier 1x4

Connect one HDMI source to as many as 4 displays simultaneously

The Tributaries HDA140 HDMI Distribution Amplifier is the most advanced solution for HDMI signal distribution. Designed with signal amplification and equalization, the HDA140 will provide high performance audio and video with no signal loss.

For long cable runs, each buffered output can ensure 1080p performance with up to 30 meters (approx 100ft) of quality HDMI cable from the HDA140 to the display device. A total distance of 40 meters can be achieved using a 10 meter HDMI cable (maximum) from the source to the input of the HDA140.

To accommodate more than 4 displays, the HDA140 can be cascaded with a 2nd unit to provide signal to a total of 7 displays. HDCP is supported ensuring each output operates independently. Operational status of the HDA140 is provided by "HDMI/DVI", "HDCP" and "SYNC" LEDs on the front panel.

Fully certified for HDMI v1.3 performance, the HDA140 supports the following features:

- 225MHz (6.75Gbps) bandwidth
- Up to 1440p resolution
- Deep Color – 10, 12 & 16 bit Color Depth
- Dolby® TrueHD and DTS®-HD Master Audio
- Refresh rates up to 120Hz
- CEC – Consumer Electronic Controls
- xvYCC Color Space
- HDCP 1.1 compliant
- Supports EDID

The HDA140 has a 2 year parts & labor warranty. Packaged with a 5VDC power supply with multiple adapters for 110V – 250VAC, the HDA140 (part # **ELEC-HDA140**) is available now with an MSRP of \$450.
