

## HOT NEW PRODUCTS

### TRIBUTARIES proudly introduces Two New Power Products

Designed with the latest electronics to prevent damage from power surges, safety engineered to meet the strict testing requirements of Underwriters Laboratories, UL®, the Tributaries® T1 Rotating AC Outlet & T8 AC Power Strip will protect the investment your customers have in their valuable home entertainment electronics.

#### T1 Rotating Outlet

A single surge protected outlet that can be rotated 360°, the Tributaries T1 provides a space-saving solution to any static AC outlet. The “PROTECTED” LED indicates that the AC surge protection is operating. The T1 is a 12A, 1875 Watt device providing 202 joules of surge suppression. At an SRP of \$20, the T1 is available now.

#### T8 Power Strip

For ease in connecting standard AC plugs and “space-hogging” wall-wart type power supplies, the Tributaries T8 Power Strip has been designed with 8 total outlets, 6 outlets that rotate 180° and 2 fixed outlets. Surge protection is provided for all 8 outlets as well as the RF connection of Cable TV or Satellite Receiver. To prevent unwanted Electromagnetic Interference (EMI) and Radio Frequency Interference (RFI) from entering your connected components, the T8 provides AC line filtering. Check out the cord management clamp. Positioned at the one end of the power strip, the clamp can be raised and lowered to provide a place for securing the AC cords. Indicator lights on the T8 will give you information about its operation. The “GROUNDED” blue LED will illuminate if your electrical system is properly grounded. The “PROTECTED” LED indicates that the AC surge protection is operating properly. The T8 is a 15A, 1875 Watt device providing 2160 joules of surge suppression. At an MSRP of \$50, the T8 is available now.

#### UL® Listings

Through the application of rigorous engineering and design as well as adherence to proper scientific principles, UL® listings ensure the T1 & T8 meet all current safety standards. The Tributaries® T1 has been granted 1449, 1363 and 498A UL® listings, while the T8 has received 6.

#### RoHS Compliant

To provide the highest degree of safety precautions, the T1 & T8 are RoHS compliant and exceed the requirements of California SB20; The Electronic Waste Recycling Act of 2003.
