

Tributaries[®] Plugs In Flexible New Power Strip

Orlando, FL—October 2007—Tributaries[®], the Florida based company that has established itself as a clear leader in the value-high-end segment of the audio-video/custom-installation cable and accessories marketplace, today introduced their latest product - the innovative new AC power strip, the Tributaries[®] PWRS-T10.

The 'T10' offers the peace of mind that comes with highly effective surge suppression and noise filtering for AC power, and signal—line protections for telecomm (RJ-11), network (RJ-45), and cable/antenna/satellite (F-connector) signals, in a single compact and attractive unit.

The PWR-TX also offers great convenience, thanks to the unique swivel action of five of its 10 outlets, which permits unique flexibility in accommodating bulky AC plugs – plus the ability to see at a glance whether the units MOV's are functioning and therefore fully protecting the connected equipment.

Every bit as important, the Tributaries[®] PWRS-T10 delivers high level protection from surge, over-voltage, and powerline noise or electromagnetic interference. Surge protection is employed across all three “legs” of the AC circuit, with voltage-spike protection to 6 kVolts and peak current-spike handling up to 192 kAmps. EMI/noise filtering extends up to 58 dB of power-cleaning suppression over a range of 150 kHz to 100 MHz.

The unit's single-line telecomm, network, and coax protections each accept 1-in/1-out connections, and incorporate well engineered, high-performance and low-loss protection.

The new T10's power sockets are laid out in two rows, each of 5 three-prong outlets. One row is fixed, with integral safety shutters, and along the other row, each individual outlet can rotate up to 90°, allowing, for example, every other plug to approach from the strip's edge rather than its top - thus allowing the connection of multiple bulky power-supply modules without interference.

The unit also incorporates a pair of blue LED indicators, showing "OK" status of its surge-protection components, and of house-wiring grounding. Heavy-duty rated at 15 amps for up to 1875 watts of load, this offers plenty of coverage for an entire high-performance home theater system.

The Tributaries® PWRS-T10 power-strip is equipped with fixed, high-quality, 3-prong (IEC) power cord, and packed with one each telephone, network, coaxial (F-connectors) cables and features a \$25,000 connected equipment warranty. It is available now, with an MSRP of \$80.

About Tributaries®

Established in 1991 in Orlando, Florida, Tributaries® is an acknowledged leader in the design, production, and distribution of high-quality audio and video interconnect cables, speaker wires, accessories, and electronics. The company prides itself on its customer service, and has won the CE industry magazine *Inside Track* Supplier Loyalty Awards a total of ten times in the past eleven years.

Tributaries® is a wholly owned subsidiary of Gordon J. Gow Technologies, Inc.
