

TRIBUTARIES[®] Grows Structured Cable Range

RGB-Plus-2x-Cat5 Yields Immense Install Flexibility

Orlando, Florida, August 2008—Tributaries[®] Cable's wide range of high-quality/high-value cables, connectors, terminations, and custom hardware problem-solvers has already earned it leadership status in the high-end sector of the burgeoning cable and custom-installation-accessory market. The company's latest addition is a new bulk "structured cable" dubbed **TRIBMINI5D2** that combines five solid-core coaxial wires with two CAT5E bundles (10 signal-paths total) for an incredibly flexible wiring solution. Nevertheless the slick, easy-pulling TRIBMINI5D2 cable is little if at all more challenging to snake and finish than conventional CAT5+RG6.

The new Tributaries' double-CAT5E and five-wire-RGB combo yields an almost limitless range of possible configurations of analog audio and video, RF, data, and digital AV via long-run "balun" systems, making whole-house hi-def/data networks easy and cost-effective as never before. Its five coaxial lines (red, green, blue, yellow, white) feature solid-core 23AWG copper center conductors, each surrounded by foamed polyethylene (PE) dielectrics, aluminum/Mylar[®] 100 percent wraps with 25 percent overlap, and tinned-copper 97 percent braided shields. Accompanied by dual CAT5E bundles, all is enclosed in a black PVC overjacket, with filler between conductors to provide a soft, smooth outer surface, and a thin paper wrap that acts as a "lubricant" between the inner conductors and the outer jacket to ensure easy, reliable stripping.

Highly flexible, with UL[®] ratings CL2 and CMR, Tributaries' new TRIBMINI5D2's nominal O.D. is 0.630 inches (16mm). Available immediately on wooden spools of 500ft, at manufacturer's suggested pricing of \$**????**.

About Tributaries®

Established in 1991 in Orlando, Florida, Tributaries® is an acknowledged leader in the design, production, and distribution of high-quality audio and video interconnect cables, speaker wires, accessories, and electronics. The company prides itself on its customer service, and has won the CE industry magazine *Inside Track* Supplier Loyalty Awards a total of eleven times in the past twelve years.
