

## **Tributaries'<sup>®</sup> Introduces Flat-Panel Power Pak**

**Three-outlet pak brings rotation, surge protection, and AC line filtering**

**Orlando, FL—September 2009—**Tributaries<sup>®</sup> Cable, the Florida company that sets the standard for high-performance, high-value accessories and cables for custom home audio and home-theater installations, is pleased to announce the **T3 Flat-Panel Power Pak**. The new triple-outlet model incorporates high-current surge protection and RFI AC line filtering.

The T3 features a super slim design—with a depth of just 1.5 inches, the entire unit plugs directly into the wall socket, easily fitting behind a flat-panel unit. To assure maximum clearance behind a display, the T3 has three edge-mounted AC outlets; two fixed outlets as well as one AC outlet and one RF connection outlet that can be rotated 90° providing variable plug-in arrangements.

The T3 offers substantial surge protection: 1080 joules and the benefit of AC line filtering, substantially reduces the possibility that radio-frequency noise will be induced via the AC supplies of connected audio or audio-video components, as well as a red “Protected” LED to confirm the unit is working properly.

For consumer peace of mind, the Tributaries T3 exceeds current safety standards and carries multiple UL<sup>®</sup> listings in their relevant categories. Additionally safety measures include RoHS (Restricted of Hazardous Substances) compliancy; meeting or exceeding the requirements of California SB20: The Electronic Recycling Act of 2003.

***The Tributaries T3 is now available with an MSRP of \$60.***

## **About Tributaries®**
