

## **TRIBUTARIES<sup>®</sup> Delivers Bundled Cables**

**Serving the needs of today's demanding AV systems integrators**

**Orlando, FL—June 2007**—A quartet of “bundled” bulk cable solutions from TRIBUTARIES<sup>®</sup>, known worldwide for its award winning service in the audio, video, and custom-installation cabling and accessories industry is launching today. These new solutions will make designer/installers’ jobs easier, while also making projects more successful and economical. TRIBUTARIES<sup>®</sup> offers a “mini-RGB” cable in three versions, plus an intensively bundled quad-CAT5+RG6 cable engineered to deliver one-run efficiency and economy that is able to cover a broad range of system and installation needs.

The TRIBMINI family bundles high-performance, individually insulated RGB conductors—fully capable of long-run transmission of High Definition and standard analog video including all configurations of component and RGB/H/V—in a single, flexible, compact, easy to ‘pull’ cost-saving, UL<sup>®</sup> CL2, FT4 PVC jacket. There are three variations forming easy-to-run solutions for video, video+audio, and video+audio+data requirements; the TRIBMINI3 delivers 3x RGB (23AWG); the TRIBMINI5 5x RGB, and the TRIBMINI6D1 bundles 6x RGB with an individually jacketed CAT5E 350MHz twisted-pair data cable, all in a single PVC overjacket.

The TRIBD4V1 is a very different type of solution and is engineered to meet the needs of the most up-to-date distributed-system designer. For this market, Tributaries’ TRIBD4V1 serves as a ready answer: four 350MHz-capable CAT5E groupings, including one that is shielded (CAT5ES), plus a high-end quad-

shielded, solid copper 18AWG center conductor RG6QSC run for any antenna, satellite, or RF-video needs. Designed with a UL® CMR FT4 PVC-jacket the TRIBD4V1 makes for a flexible, highly adaptable, space-efficient and high-value resource for a wide range of custom-install challenges.

All three models of TRIBMINI and the TRIBD4V1 are RoHS compliant (Restricted or Hazardous Substances).

Tributaries TRIBMINI family of bundled RGB cabling and TRIBD4V1 bundled CAT5/RG6 cabling is available on 500-foot bulk spools. Pricing is available from the factory. TRIBD4V1 and TRIBMINI3 are now shipping. TRIBMINI5 and TRIBMINID61 will be available in September.

### **About TRIBUTARIES®**

Established in 1991 in Orlando, Florida, TRIBUTARIES® is an acknowledged leader in the design, production, and distribution of high-quality audio and video interconnect cables, speaker wires, accessories and electronics. The company prides itself on its customer service, and has won the CE Industry magazine “Inside Track” Supplier Loyalty Awards a total of Ten times in the past Eleven years.

TRIBUTARIES® is a wholly owned subsidiary of Gordon J. Gow Technologies, Inc.
