## Tributaries Offers Remote Protection and Filtering for Displays and Projectors

by Michael Riesenbeck on Sep 26, 2011 at 01:17 PM

Add a Comment

As the home entertainment landscape continues to evolve and homes become filled with more components, the question of how to keep all of your precious babies protected becomes tricky. Tributaries has a neat solution, though: PWRI-XF In-wall AC Power Extension Outlet Kit.

With the PWRI-XF, users can remotely protect and filter electronics. The kit includes a dual AC outlet with filtering built into the housing, a Neutrik 120V/20A UL rated AC PowerCon inlet mounted on a single-gang white Decora wall plate for installation close to the T100/T200 Power Manager, and a 14AWG shielded AC Power Cable with a Neutrik PowerCon AC plug on one end and a Nema 5-15, 3-prong straight or right angle AC plug on the other end. The PWRI-XF is particularly good for protecting a television or projector that is located away from other components. The unit also provides a clean source of power at up to a maximum of 1800W/120V/15A.

Kits are available in six-, nine-, and twelve-foot models and can fit dual- or single-gang wall boxes. The PWRI-XF carries a retail price of \$160 to \$180 depending on the configuration. For more information visit Tributaries or call 800.521.1596.
