

ELEC-AC200

Description

The Tributaries AC200 is a bidirectional Audio Converter. With three different types of connections (digital coax, Toslink optical and 2 channel analog R/L audio), the AC200 can convert all three signals into any desired format.

Features

- Integrated digital filter and Digital-to-Analog Convertor (DAC)
- Integrated Analog-to-digital Convertor (ADC)
- Supports sampling frequencies from 16 to 100KHz
- Select from Coaxial, Toslink or R/L audio and send the signal to all three outputs simultaneously.
- Supports Dolby® / DTS® only when in use with Coaxial and Toslink input and output
- Compact design and easy to install and use
