

48G HDMI CABLES

8K/60 Ultra
HDMI – Are
You Ready?

In the spirit of the true cinephile, Gordon J Gow Technologies, Inc. developed Tributaries 48G UHD HDMI cables, the most advanced line of Ultra High Definition HDMI cables available today. Designed by film lovers for film lovers, Tributaries ULTRA HDMI cables were developed using meticulous electronic engineering designed to exceed HDMI specifications by a minimum 20% providing headroom to overcome possible system inadequacies.

48G Ultra HDMI Performance Capabilities

The Tributaries 48G HDMI cables are fully compliant with HDMI 2.1 specifications - transport HDMI data rates up to 48Gbps, with resolutions of up to 8K and 10K, frame rates up to 120fps, color depths up to 16-bit color and color sampling p to 4:4:4. Then other features in v2.1 are: Dynamic HDR and eARC, Quick Media Switching (QMS) for delay-free source switching; for gaming - Auto Low Latency Mode (ALLM), Variable Refresh Rate (VRR) and Quick Framer Transport (QFT).

Focus on eARC & Dynamic HDR

eARC is a much more robust audio delivery system than the original ARC. eARC supports 5.1 and 7.1 systems as well as 32 channels of audio and eight channels of 192 kHz, 24-bit uncompressed 38Mbps data streams. It also supports DTS-HD Master Audio, DTS:X, Dolby TrueHD, and Dolby Atmos, eARC can deliver a substantially improved surround sound experience with more immersive and nuanced audio.

Dynamic HDR provides enhanced video images for deeper blacks and brighter whites with greater detail in both the dark and bright parts in the same image. While Standard Dynamic Range (SDR) provides an average level of black to white contrast for an entire movie, Dynamic HDR presents a black to white contrast for each frame of a movie bringing scenes closer to realism

Power Grip:

The UHDM MAXIMUM cable has the patented Power-Grip™ connector. Multi-locational raised elements provide proper tension top-to-bottom and side-to-side. We guarantee our connector will not shift in the electronics causing signal drop outs.

Testing 48G HDMI Cables

At Tributaries, testing cables is taken very seriously. We are the only cable company in the industry that tests every HDMI cable after it arrives from the factory using the Murideo Fresco Six-G/A HDMI 2.1 and HDCP 2.2 generator. This portable hand held UHD generator and analyzer will process an HDMI 2.1, 40Gbps signal of 8K/60Hz with 10-bit color and 4:2:2 color sampling. In addition, the Fresco Six-G/A also tests the recessed pin #19: Hot Plug Detect. We confirm HDMI 2.1 and HDCP 2.2 compliance of every cable.

Tributaries: Totally Tested, Tried and Trusted!

DPL Labs 48G Seal of Approval

Tributaries UHDM Maximum models have passed rigorous True Image Testing™ by DPL Labs and earned the 48G 8K Reference Standard Certification. Tributaries is proud to be the first cable company to receive this prestigious 48Gbps 8K certification. To learn more about DPL Labs go to: www.dpplabs.com

PASSIVE 48G HDMI CABLES

HDMI (High-Definition Multimedia Interface) is a propriety interface for transmitting video/audio/control data between HDMI compliant devices. HDMI is the digital replacement for analog audio & video. Why is passive so important? Passive HDMI cables are always preferred over active. In addition to incompatibility issues with other electronics, active cables are directional and will not work if reversed. The active cable requires power to supply the on-board electronics; typically, these cables harvest their power from unused TMDS voltages. This method works well if the source which drives the 5V line has an adequate output. If the source voltage is too low, it will draw down the vital 5-volt line. Passive cables are bi-directional and voltage agnostic, making any installation simpler and more stable. HDMI cables are sold in each.

MAXIMUM SERIES PASSIVE 48G HDMI CABLE

MODEL: UHDM

MAXIMUM 48G performance ULTRA HDMI cable

Tributaries UHDM MAX 48G Ultra HDMI cables provide the best 48G performance available anywhere. Extreme precision engineering and advanced testing was done to perfect the MAX cable performance. Designed to provide the maximum amount headroom above the HDMI standard, the UHDM delivers optimal performance for today's and tomorrow's most demanding AV environment. Strength and protection were built into every connector with Tributaries Full Body Armor Shielding. The Power Grip connection not only maintains positive top and bottom fit but left and right too; the connector stays put in the precise location even when installed in a moveable display. The UHDM delivers Dynamic HDR, resolutions of 8K60, 4K120 and 10K; supports eARC, Quick Media Switching (QMS), Auto Low Latency Mode (ALLM), Variable Refresh Rates (VRR) and Quick Frame Transport (QFT).

Get it all with Tributaries UHDM MAX 48G Ultra HDMI cables installed in your system.

The UHDM MAX Series Passive HDMI cable is stocked in each in lengths from 1/2 meter to 3 meter

Model UHDM MAXIMUM Highlights

Made in China. Designed, packaged and tested in Orlando Florida, USA

DPL 48G Certified to support 4K/120Hz, 8K/60Hz, 10K/24Hz

Guaranteed to pass data rates of 48Gbps

Guaranteed to support Dynamic HDR, eARC, Variable Refresh Rates, Auto Low Latency Mode, Quick Frame Transport and Quick Media Switching

Full Metal Jacket Protects ingress and egress of EMI interference

Power Grip connectors stay put even when installed in moveable displays

Available in lengths of 1/2 meter to 3 meter
